

**BAY AREA AIR QUALITY MANAGEMENT DISTRICT  
2003 REGULATORY MEASURES LIST**

December 17, 2002

Each year, the District is required by Health and Safety Code section 40923 to publish a list of regulatory measures scheduled or tentatively scheduled for consideration during the next calendar year. If a measure is not on this list, it may not be brought before the Board unless it is necessary (1) to satisfy federal requirements, (2) to abate a substantial endangerment to public health or welfare, (3) to comply with state toxic air contaminant requirements, (4) to comply with an ARB requirement that the District adopt contingency measures due to inadequate progress towards attainment, (5) to preserve an existing rule's "original intent," or (6) to allow for alternative compliance under an existing rule.

The table below lists all measures that may come before the Board in 2003. Some of the measures fall within exceptions listed above but are nevertheless included for completeness. Clean Air Plan and federal Ozone Attainment Plan measures proposed for adoption in 2003 are included. There is no expectation that all of the measures on the list will be enacted during the calendar year. Rules are listed in numerical order as they appear in the District Rules and Regulations. Objectives are listed for information only and are subject to change. Rule development efforts for a rule are not limited to listed objectives.

All new rules and rule amendments must be adopted at a public hearing conducted by the District's Board of Directors. Public comment is accepted at these hearings. Public notice of hearings is provided as required by law. In addition, the District conducts public workshops and provides opportunities for written comments before scheduling a rule for public hearing. Information on workshops, hearings, and other rule development issues may be obtained from the District website ([www.baaqmd.gov](http://www.baaqmd.gov)) or by calling the Planning Division at (415) 749-4995.
